

FCC: I strongly oppose petition 04-160 and support XM radio's freedom to provide their programming (including traffic and weather). I turn on the XM traffic and weather the first thing when driving my car, because it is immediate and more precise than the local radio stations. I love XM radio...it has unique and quality programs and music that I cannot get anywhere else. It keeps me focused and entertained on long drives. In addition, it broadcasts CNN, ABC, C-Span, etc., without commercials, which are available on TV but not in real time in my car as I am commuting or traveling. I paid a lot of money for the XM radio and even more for the installation in my new car -- and I bought it confident that I would continue to get the stations they now broadcast and in addition, more innovations in the future. Thank you. Gail Goldyne
